# Installation Guide

# PayPobre

Version 1.0 – December 2022

# Table of Contents

# 1 Introduction

## 1.1 Purpose

This document describes the installation process of PayPobre on supported platforms like Windows 10 and 11.

# 2 Installation Manual

## 2.1 Pre-requisites
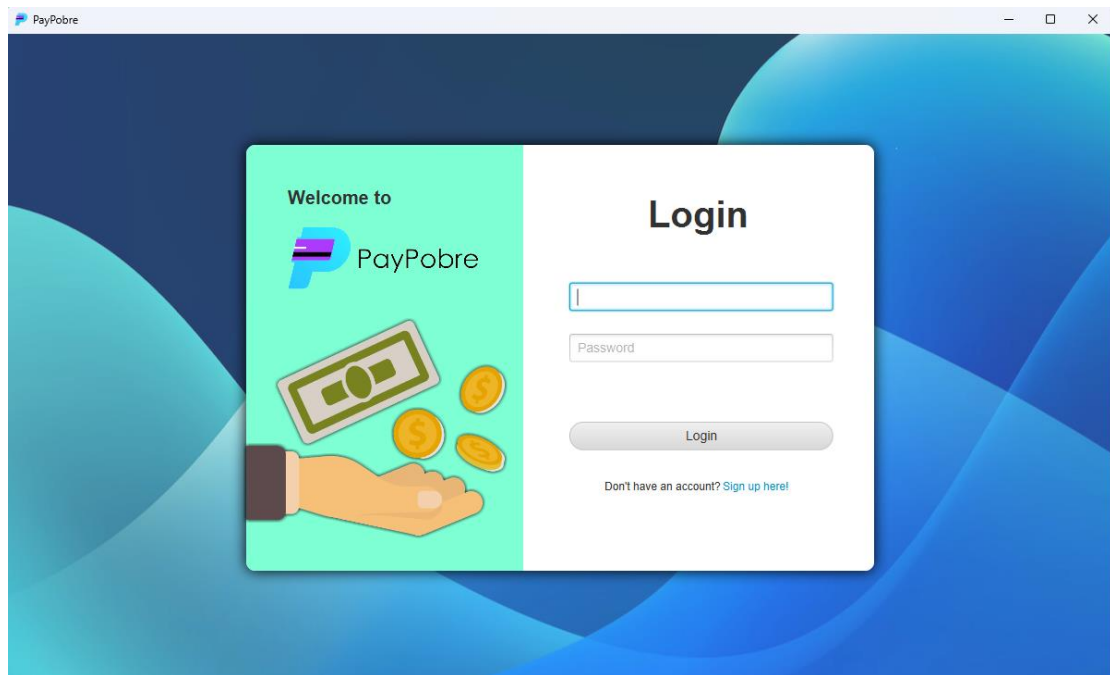

Recommended system requirements:

- Windows 10, 11
- JDK version 19
- FEUP VPN connection

## 2.2 Pre-installation Tasks

- Start by installing FEUP VPN and connecting. You can use the following link: https://www.up.pt/it/pt/servicos/redes-e-conetividade/vpn/configuracao-manual-feup-windows-10-ssl-check-point-capsule-9760aab4

- Then you must install the Java Development Kit OpenJDK-19. You can use the Following link: https://www.oracle.com/pt/java/technologies/downloads/#jdk19-windows

## 2.3 Installation Procedure

Once you have downloaded the file provided – PayPobre.jar - you should be able to double click it and run it, always making sure that your are connected to FEUP VPN.

**Note:** In some cases, your system may not be properly configured to launch the jar file just by double clicking it. If so, we recommend following this guide, where you will learn to set the JAVA_HOME environment variable to the correct JDK location: https://www.baeldung.com/java-home-on-windows-7-8-10-mac-os-x-linux
